Primary Aura color(s) –
The colors were in a state of disarray.

There were 2 pronounced Breaks in the Energy Aura. The appearance was it was about to break in half (at the midsection). There were 2 DFEs identified – and he was aware of these energies, and had no desire to be rid of them. (*as we surmised*) There have been MANY that have come and gone. The two primary were perceived as one with what we would call an arm around the back and the second with hands attached to the ankles.

There were also 2 female energies (living in the physical) that almost boost his desire to desert.. encouraging his exit.

It was perceived that - at that time – he had no desire to have the condition repaired or improved.-----

Two DFEs and 8 discarnate humans were converted and are now in the Light. This and ancillary activities resulted in wonderful progress for MANY, so we Express our thanks for the opportunity. ~ George, Missy, Ray & Gurney. We also sent light into Chase and wrapped up around 9:30. When we ceased, he was clean.

Recommendations: Chase would benefit by learning modalities that allow him to release the infractions of his past. (Faster EFT as an example).
